

**SIDE ACTING DRIVE SHAFT
ENGAGEMENT FOR A DATA CARTRIDGE**

Abstract of the Disclosure

A drive and cartridge combination (10) includes a cartridge (20) for insertion into a drive (100). A driven roller (36) is rotatably mounted in the cartridge (20). A driven member (39) has a drive member capturing member (39d, 39e). The drive member (110) is moveable in a second direction by the driven member (39) when the cartridge (20) is inserted in a first direction into the drive (100).
